## CloudWatch Logs

Lambda logs all requests handled by your function and automatically stores logs generated by your code through Amazon CloudWatch Logs. To validate your code, instrument it with custom logging statements. The following tables list the most recent and most expensive function invocations across all function activity. To view logs for a specific function version or alias, visit the **Monitor** section at that

### Recent invocations

#	Timestamp	RequestId	LogStream	DurationInMS	BilledDurationInMS	MemorySizeInMB
1	2024-10-14T01:58:36.558Z	ff1fb73c-9174-4673-8cd1-1e6a5d1c8d08	2024/10/14/[BLATEST]/712bdf5b138c9482wb24320875423c568	11.31	12.0	128.0

### Most expensive invocations in GB-seconds (memory assigned \* billed duration)
